#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on \_\_\_\_\_.
- 2a) This action is **FINAL**.                            2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Drawings***

1. New corrected drawings are required in this application because the drawings received on 8/25/2003 are not professional and in accordance with the US Patent and Trademark Office standards. Applicant is advised to employ the services of a competent patent draftsperson outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2, 5 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent 4,040,268 to Howard. Looking at FIG. 2 of Howard, one finds the system claimed by the applicant, namely a dual circuit evaporator coil, assembled in an A-frame fashion, where the circuits are intertwined and constructed in a diagonal manner to set up the active coil in touch with the incoming air along the whole surface when the other coil is not working (col 4, lines 24-33).

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 3 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent 4,040,268 to Howard. Howard discloses applicant's basic inventive concept, a dual circuit evaporator coil, assembled in an A-frame fashion, where the circuits are intertwined and constructed in a diagonal manner to set up the active coil be in touch with the incoming air along the whole surface when the other coil was not working, substantially as claimed with the exception of stating the use of the heat exchanger in a heat pump mode. This trait is however, well known in the art, especially when discussing the topic of dual circuit heat exchangers. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the system of Howard, by using the evaporator as a heat pump in order to diversify the product.

***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Patent 3,866,439 to Bussjager, Rudy C. et al.

U.S. Patent 4,712,612 to Okamoto, Masayoshi et al.

U.S. Patent 6,109,044 to Porter, Ronald D. et al.
